

Help us to plan for sport and recreation on the Sunshine Coast over the next 15 years...

Sport and recreation is an integral and important part of our coastal lifestyle. It contributes to the liveability of our region and the health and wellbeing of the community.

It is important that we plan to meet the sport and recreation needs of the existing and future population while ensuring valuable resources are well managed and protected for future generations.

Consultants *Strategic Leisure Group* have been engaged to assist in preparing a comprehensive Regional Sport and Recreation Strategy to help guide Council planning to 2025.

The strategy will focus on sport and active recreation activities that require legitimate/formal venues.

How do I get Involved?

Council wants all members of the public to have the opportunity to be involved in the planning for our future sport and recreation needs.

A wide ranging community engagement plan has been developed, inviting all members of the community to be involved in the study and to provide input on your needs and those of your local community.

There will be many opportunities to express your views including:

- Completing an on-line survey
- Attending a Forum in your local community
- Email, blogs, focus groups, facebook, organisation surveys, or written submissions

Register your interest in the study by contacting the project team:

- SMS: 0412 395102
- Email: scsport@strategicleisure.com.au
- Phone: 1300 734626 (local call cost)

More information about Community Forums, surveys and other consultation will be available on Council's website and local media in November. Follow the prompts to the Regional Sport and Recreation Strategy at www.sunshinecoast.qld.gov.au
